

AF2000

HIGH EFFICIENCY AIR PURIFIER

Designed to handle high concentrations of chemicals, gases, odors, particles and biological contaminants, the AF2000 delivers superior air quality for high performance training centers.

The AF2000 high efficiency air purification systems are used on a large scale in gyms and professional training facilities, providing the very best training and performance advantages for athletes.

During periods of intense physical activity, more air is inhaled with each breath, most of it through the mouth, bypassing the natural filtration system and allowing the pollutants to go deeper into the lungs.

Recent studies found elevated levels of airborne dust and chemicals, notably formaldehyde, in indoor training facilities. In sufficient concentrations, these pollutants can contribute to decreased performance, asthma and other respiratory problems.

STANDARD CONFIGURATION

- Very high volumetric flow rate
- Whisper quiet operation
- Multi-stage filtration system: pre-filter, HEPA and chemical filter
- Custom filter configurations available
- Front door access to filters for easy service
- Intelligent controls, digital speed control, audible & visual alarms

Air Flow:	Nominal 1700 m ³ /h / 1000 CFM
Voltage:	120V or 230V
Dimensions:	24" W x 26" D x 71" H / 610mm x 660mm x 1800mm
Filtration:	Pre-filters Chemical filter, up to 100 lbs / 45kg Medical grade HEPA filters 99.97%
Inlets/Discharge	Adjustable grilles
Sound Level:	Whisper quiet, 54 dBA
Controls:	Remote ON/OFF, communication capabilities, audible and visual alarms

5 STAGE FILTRATION SYSTEM
